## Quiz \#10

In this quiz you are tasked with creating a modern art piece. Using hover states over nth-child, and translucent colors, you should create a mixing board out of the table presented. Alternating rows and columns should have different backgrounds - resulting in emergent color combinations.

Note: you need only use the $t r$ and td selectors, and :nth-child and :hover pseudo selectors. Additionally, you are encouraged to experiment with your own color combinations and nth-child intervals - though you must have at least three distinct states for each selector.

|  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |

You will be scored on code cleanliness.
