

CSCI 311 Spring 2020 Final Project

The Project:

The final group project is your chance to apply and show off what you've learned in the course. The project is designed to be open-ended to let students work on projects that are of interest to them. You're welcome to work on a project that you'd like to continue to work on later, add to your portfolio, build for a friend or family member, etc.

Teams of three (3) will be formed in the first couple weeks of term, as detailed in the **Team Formation** document.

Note: The goal of this project is to build a website from the ground up.

- You may not refactor or redesign a website that you've built before
- You may not use tools like WordPress to build code

Overview:

This project will take place over the course of the term, and consists of the following deliverables:

- Proposal 5%
- Functional Prototype 10%
- Formal Peer Evaluation and Self-Assessments 10%
- Working Project 50%
- Stretch Goal Presentation 10%
- Live Demo (in lab) Demo 15%
