

# CSCI 265 Quiz 2

- Covers all of the first four weeks of lecture/lab material, emphasis on material not previously quizzed
- Will be available from 7am to 7pm (PDT) on Oct 2
- Once you start, you have 50 minutes to complete
- Questions are randomly ordered for each student, and most questions have several variations
- Once you finish a question you cannot go back

# Question styles and topics

- Questions are a mix of short answer, multiple choice, multiple-select, and longer written (well, typed) answers
- Questions focus on more advanced use of git (branching, merging etc), bash scripting (functions, scripts, parameter handling, error checking, pattern matching, etc), and SDLCs (agile, spiral, waterfall)
- 8 questions, 3-8 marks each, 42 total marks
